Description:

Introducing a new ultra-modern project in a prestigious area of Limassol. The complex of 5 villas with private pools is located on an elevated position with a magnificent panoramic view of the sea.

The presence of all communications, convenient access roads, developed infrastructure, combined with some isolation of the complex and non-standard architectural solutions of the villas make this project especially attractive for people who value peace and independence.

The main emphasis in the planning of the villas is placed on comfort and functionality. A large basement floor allows you to solve any problems of organizing space, and high-tech equipment simplifies operation as much as possible. During construction, heat and sound insulation is performed, thermal bricks are used, which allows you to save electricity in summer and winter. Natural materials are used for decoration: wood, stone, glass, metal.
